Response to Office Action dated August 16, 2004

Application No. 09/868,667

### LISTING OF CLAIMS

1. (Previously Presented) A method for creating a presentation on a computer system, comprising the steps of:

(a) receiving goal-related information indicative of a goal, the goal-related information specifying one or more learning objectives of the presentation, the goal being associated with a training objective;

(b) querying a user for user-related information based on said one or more learning objectives of the presentation;

(c) analyzing the user-related information from user responses to ascertain

\*\*\*\* characteristics;  
(d) integrating instruction-related information that motivates accomplishment of the goal for use in the presentation based on the user characteristics; and

(e) evaluating progress toward the goal and providing feedback based on the user characteristics that further motivates accomplishment of the goal.

2. (Previously Presented) The method for creating the presentation as recited in claim 1, including the step of instantiating a particular feedback model based on the characteristics of the user.

3. (Previously Presented) The method for creating the presentation as recited in claim 2, including the step of analyzing the user responses using an expert system to determine characteristics of the user.

4. (Previously Presented) The method for creating the presentation as recited in claim 1, including the step of creating a tailored presentation based on the characteristics of the user.

5. (Previously Presented) The method for creating the presentation as recited in claim 4, including the step of storing portions of the tailored presentation based on the characteristics of the user.

Application No. 09/868,667

6. (Previously Presented) The method for creating the presentation as recited in claim 1, including the step of selecting examples based on the characteristics of the user.

7. (Previously Presented) The method for creating the presentation as recited in claim 1, including the step of selecting a quantitative analysis model to perform what-if analysis based on characteristics of the user.

8. (Previously Presented) The method for creating the presentation as recited in claim 1, including the step of tailoring feedback based on a character profile based on the user responses.

9. (Previously Presented) The method for creating the presentation as recited in claim 1, including the step of presenting a tailored simulation based on characteristics of the user.

10. (Previously Presented) An apparatus that creates a presentation on a computer system, comprising:

- (a) a processor;
- (b) a memory that stores goal-related information under the control of the processor, the goal-related information specifying one or more learning objectives of the presentation, the goal being associated with a training objective;
- (c) logic that queries a user for user-related information based on said one or more learning objectives of the presentation;
- (d) logic that analyzes the user-related information from user responses to ascertain user characteristics;
- (e) logic that integrates information that motivates accomplishment of the goal for use in the presentation based on the user characteristics; and
- (f) logic that evaluates progress toward the goal and providing feedback based on the user characteristics that further motivates accomplishment of the goal.

11. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, including logic that instantiates a particular feedback model based on the characteristics of the user.

Application No. 09/868,667

12. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, including logic that analyzes user responses using an expert system to determine the characteristics of the user.

13. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, including logic that creates a tailored presentation based on the characteristics of the user.

14. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, including logic that stores portions of the tailored presentation based on the characteristics of the user.

15. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, including logic that selects examples based on the characteristics of the user.

16. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, including logic that selects a quantitative analysis model to perform what-if analysis based on characteristics of the user.

17. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, including logic that tailors feedback based on a character profile based on the user responses.

18. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, including logic that creates a multimedia presentation, and including logic that presents a tailored simulation based on characteristics of the user.

## **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ **BLACK BORDERS**
- ☐ **IMAGE CUT OFF AT TOP, BOTTOM OR SIDES**
- ☐ **FADED TEXT OR DRAWING**
- ☐ **BLURRED OR ILLEGIBLE TEXT OR DRAWING**
- ☐ **SKewed/SLANTED IMAGES**
- ☐ **COLOR OR BLACK AND WHITE PHOTOGRAPHS**
- ☐ **GRAY SCALE DOCUMENTS**
- ☐ **LINES OR MARKS ON ORIGINAL DOCUMENT**
- ☐ **REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY**
- ☐ **OTHER:** \_\_\_\_\_

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.**
